### MONARCH OF THE EAST, Dec. to I.D.

In **all round** excellence it has **no superior** and we grow most of the good new ones each year. It combines gigantic size (Grows naturally 10 to 12 inches and up to 14 inches with no forcing, feeding or even disbudding. Numerous reports of **15 inch** blooms from customers.) **Beautiful color**, (warm gold, with tints of apricot and orange, with slight coppery red reverse.) **Grand stems**, 3 feet or more and stiff as canes, **prolific bloomer** from mid July until frost, **sure** producer of **giant clumps** which always keep over, and such **magnificent vitality**, no weather or insect pests will ever stop it and a dahlia any amateur can grow with perfect success. # **New Introductions for 1942**

Size of blooms introducers in most instances.

## **CHAUTAUQUA GIANT, F.D., 12 by 6 in.**

We believe this dahlia will prove to be the very last word in autumn formals, long stem—12 inches to the first leaf. The massive blooms grow without forcing 10-12 inches and readily respond to special treatment. In color it is a soft golden orange, very clear and pleasing. Centers are always tightly closed; even at the end of the season and when the blooms are fully opened. No other dahlia in our gardens has the massive appearance of this dahlia. The bush grows normally 4—4½ feet high with spreading, vigorous growth. Foliage is dark and of good substance with rather wide leaves. The blooms are held facing, of fine substance and last a long time when cut. The clumps are large and always winter in perfect condition.

On Mr. Roberts selection in the Flower Grower Honor Roll. **Plants only, \$5.**

## **COLUMBIA, S.C., Up to 16 by 10 in. with no irrigation or fertilizer.**

**Color** a beautiful blend of **deep gold** and **peach pink**. Petals curling completely back to the stem. **Stems perfect**. Center high, pointed and always perfect. Bush 5½ ft. Good root maker. Prof. C. M. Brown says, "**Columbia**, at East Liverpool was the **finest all around large flower** I ever saw. **Never** have I seen such depth. It should sweep the country." Mr. Gordon F. Waaser says, "I have grown a great many large specimen blooms but **Columbia** gave me my **greatest thrill** and the **largest bloom** I ever grew, a true **15½ by 10 in. without any forcing**, incredible as it may seem, but it was a flower so **magnificent** as to **beggar description**."

**\*\* Roots \$10. net Plants \$5. net**

## **MRS. THOMAS A. EDISON, I.D.**

**12 by 10 in.**

Brilliant, flashing, velvety color. Alone, its color would make this dahlia outstanding. It is a truly gorgeous shade of bright violet red, almost a deep rose red. The reverse is shaded silver, which shows where the outer petals twist and curl and in the high center.

The blooms have a normal diameter of 10 — 12 inches with a depth nearly equal to the width. Strong, straight stems hold the flowers facing, well above the foliage. A husky grower, the bushes are well branched and attain a height of 4½—5 feet.

**One of the most beautiful dahlias of all time.** Certificate of Merit at East Lansing. On Dudley's and Eddy's selection in the Flower Grower Honor Roll and in the House Beautiful Futurity. **Plants only, \$7.**
